

Creating a New Email Account in Thunderbird

This guide will help you set up a new Thunderbird email account with the proper server settings.

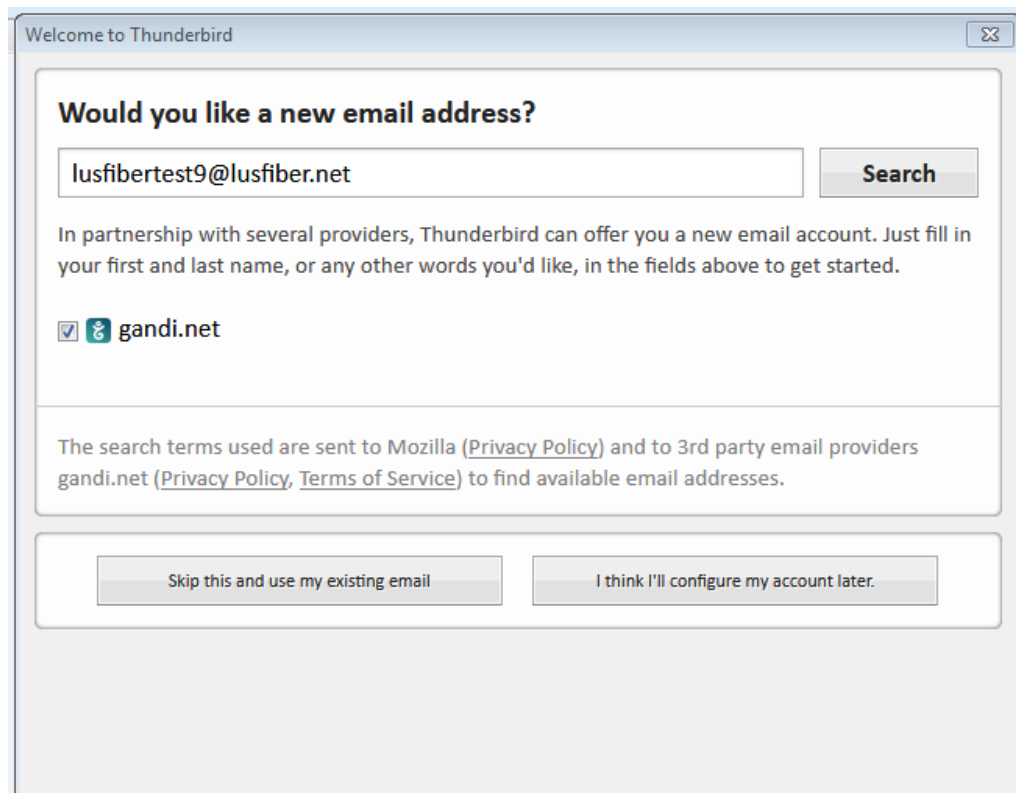

Step 1. Navigate to your Account Settings

- Open Thunderbird
- Click on the Local Folders
- Click on the Email icon under Create a new account (center of window)

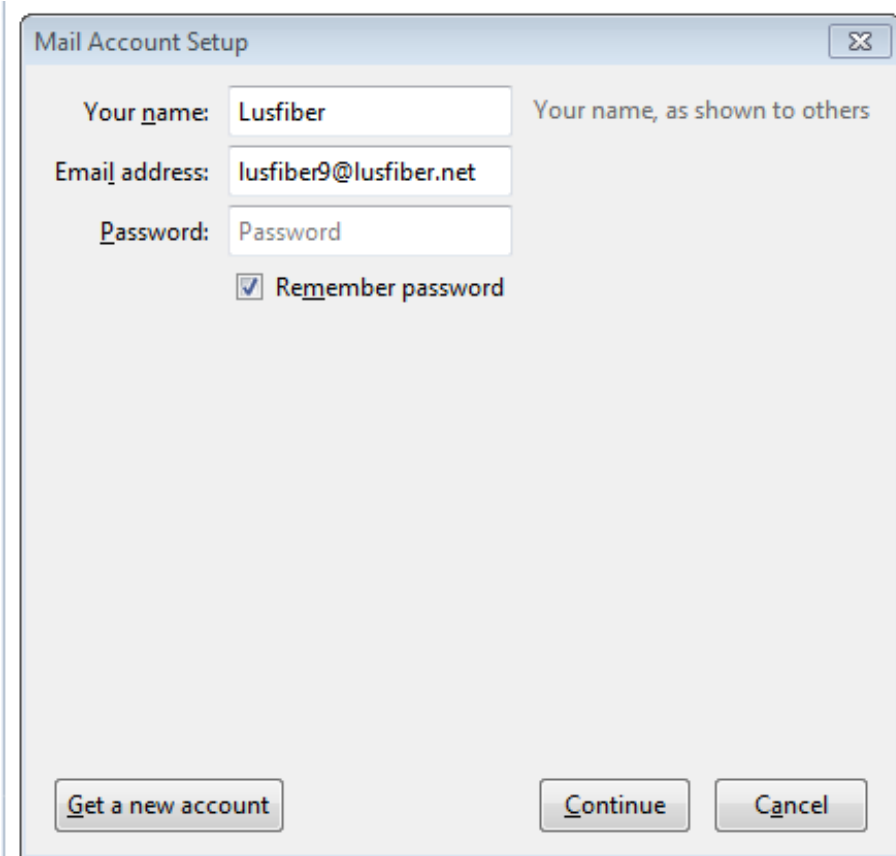

Step 2: Welcome to Thunderbird

Click [Skip this and use existing email]

Step 3. The **Mail Account Setup** window will open.

- Enter your preference in the **Your name** field
- Enter your full **Email address**
- Enter your **Password**
- Click the Continue button at the bottom

The image shows a 'Mail Account Setup' dialog box with a close button (X) in the top right corner. It contains three text input fields: 'Your name' with the value 'Lusfiber', 'Email address' with the value 'lusfiber9@lusfiber.net', and 'Password' with the value 'Password'. To the right of the 'Your name' field is the text 'Your name, as shown to others'. Below the password field is a checked checkbox labeled 'Remember password'. At the bottom of the dialog are three buttons: 'Get a new account', 'Continue', and 'Cancel'.

Mail Account Setup

Your name: Lusfiber Your name, as shown to others

Email address: lusfiber9@lusfiber.net

Password: Password

Remember password

Get a new account Continue Cancel

Step 4. The system will process your input to find your email configuration

- Make sure that IMAP (remote folders) is selected
- Click the Manual config button at the bottom of the window

Step 5: Mail Account Setup

Incoming server:**mail.lusfiber.net**

Outgoing server:**smtp.lusfiber.net**

Turn on the **SSL** and it will change the port numbers.

Authentication: **Normal Password.**

Make sure the username is full email address.

Click done

Mail Account Setup

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Configuration found by trying common server names

IMAP (remote folders) POP3 (keep mail on your computer)

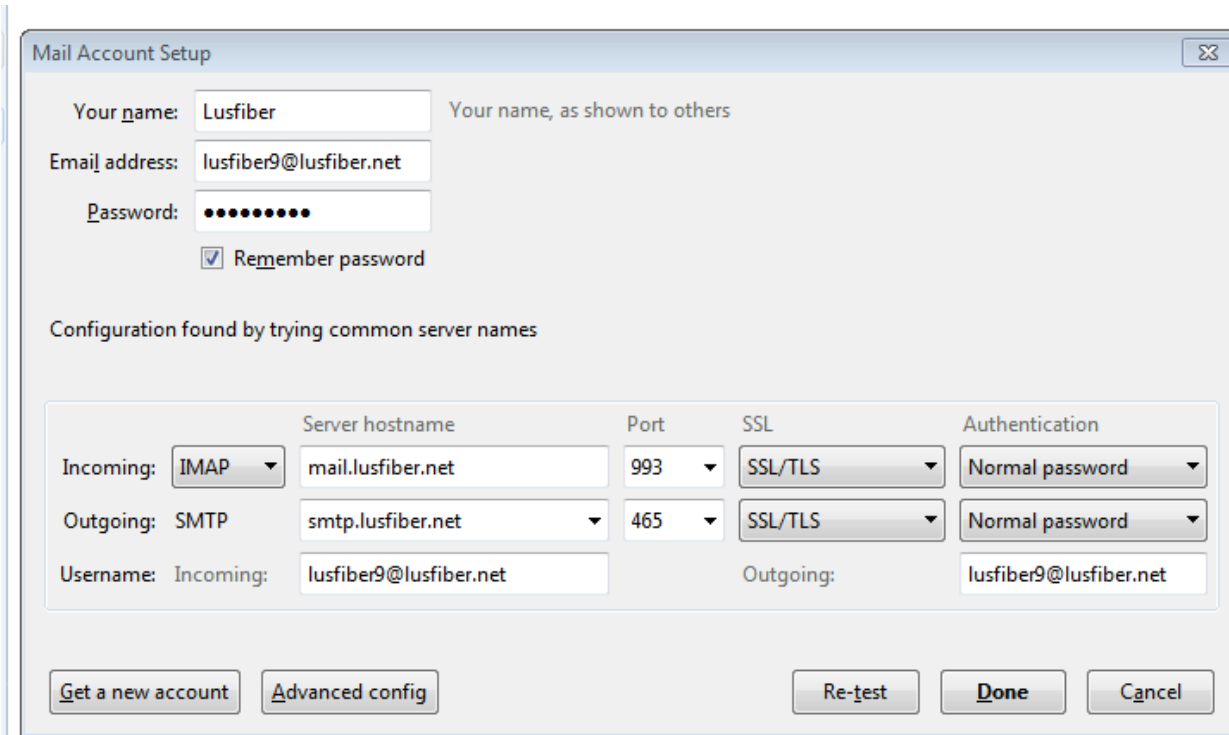

Incoming: IMAP, imap.lusfiber.net, STARTTLS

Outgoing: SMTP, smtp.lusfiber.net, STARTTLS

Username: lusfiber9

Step 6: Find email

Email address shows up on the left side on the under the local folder. This is how you can tell if the email is set up on Thunderbird.

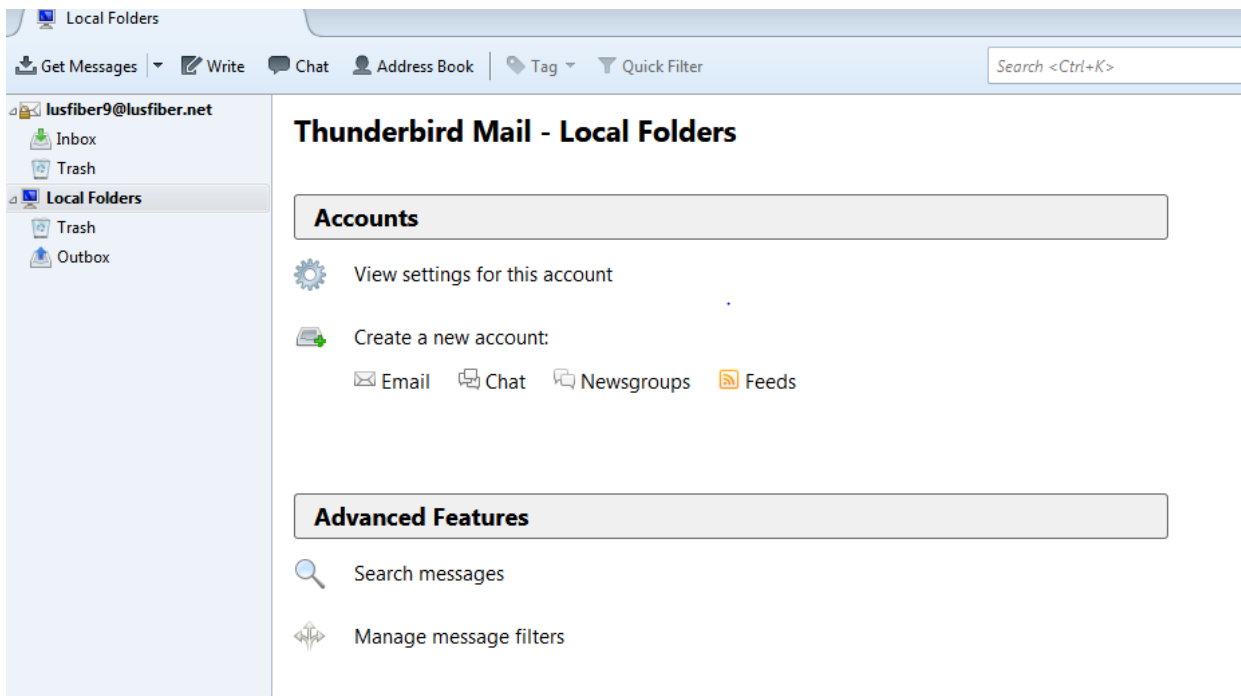

The screenshot shows the 'Mail Account Setup' dialog box. It contains the following fields and options:

- Your name: Lusfiber (Your name, as shown to others)
- Email address: lusfiber9@lusfiber.net
- Password: [Redacted]
- Remember password
- Configuration found by trying common server names
- Server configuration table:

	Server hostname	Port	SSL	Authentication	
Incoming:	IMAP	mail.lusfiber.net	993	SSL/TLS	Normal password
Outgoing:	SMTP	smtp.lusfiber.net	465	SSL/TLS	Normal password
Username: Incoming:	lusfiber9@lusfiber.net		Outgoing:	lusfiber9@lusfiber.net	

Buttons at the bottom: Get a new account, Advanced config, Re-test, Done, Cancel.

Your email is now set up. Congratulations!
